

Pill Bug Questions

1. What does the rollie-pollie do when it is agitated?
2. What happens if they get flipped onto their back?
3. Can the sow bug climb over small objects? How does it respond to and overcome obstacles?
4. How do they get back up when on their backs?
5. Can the sow bug climb up the side of a textbook?
6. What is the purpose of the antennae?
7. Are they (the antennae) the only form of guidance?
8. How does its behavior change when the lid to the petri dish is off/on?
9. Can the bugs climb each other?
10. Tested favoritism towards light and dark.
11. How do pill bugs interact with one another?
12. Can this bug climb?
13. What is the function of the 7 sections on his back?
14. How does the sow bug react to being in a more confined space?
15. What does the sow bug use its antenna for?
16. Can the pill bug climb a 45 degree angle?
17. How fast can it go?
18. How would you describe the form of sow bug's body?
19. How many ridges does it have?
20. What does it eat?
21. What is it's response?
22. Is it a male or female?
23. Does it have ears?
24. How does it move?
25. How many limbs does the sow bug have?
26. Can the pill bugs climb a 45 degree angle?
27. Can the bug hear?
28. What does the pill bug do to protect itself?

29. How does the bug move? What movements/impacts on the petri dish will make the bug move? Does it just move around the circle or does it vary its movement?
30. How does the bug know where it is going?
31. How does the bug know where it is going?
32. What does it eat?
33. What do they eat?
34. How long does it stay rolled?
35. What happens when he is exposed to light?
36. How long does it take the pill bug to flip itself over after being laid on its back? What method does he use to flip himself over?
37. How do pill bugs interact with each other?
38. How long will each roly-poly stay rolled up when touched?
39. What does it eat?
40. How do they flip themselves over when lying on their backs?
41. Why does it ball up?
42. Why does the bug keep investigating/going under the dirt?
43. What do they eat?
44. How many seconds does it take for the roly poly to flip over?
45. How do they react to light?
46. How long will it take them to go around the petri dish?
47. How does a larger one react when placed by a smaller one?
48. I wanted to figure out the extent of its climbing abilities as I could see that it could not climb out of the cup.
49. What is the best texture for pill bugs to be the fastest in?
50. Do pill bugs float or swim?
