

HUMAN?

NICHOLAS TIMMS

THE MAIN PRINCIPLES

- Evolution
- Development
- Ecology

OUR SIMILARITIES

- Reliance on something else for survival
- Forms of matter
- Reproduce one way or another

EVOLUTION

- Differences in skeletal build
- Walking method
- Clothes!

DEVELOPMENT

- Very long childhood (attachment to parents)
- Formal education throughout life

ECOLOGY

- Multiple forms of communication
- Top of the food chain
- Geographical distribution

CONCLUSION

- Humans are very unique organisms
- However, we also have lots of commonalities with all other organisms
